

A Cup Of Coffee With 12 Leading Dentists In The United States: Inspirational short stories and valuable insights into a new era of dentistry

A Cup Of Coffee With 12 Leading Dentists In The United States This is a book about relationships and life stories. Every dentist that has been invited to be a part of this book is in an elite category as a clinical dentist. You may know one of these doctors; but you may not know the challenges they have faced, the hurdles they have overcome, the joys they have shared, and the life events that have shaped their personality as a dental leader in your community, which in turn shapes your experience in their office. All of these doctors have one thing in common; they have all joined a group of dentists in an organization called Infinity Dental Partners. Owned and managed by other practicing dentists, this fraternity of doctors is collaborating and growing together to learn from each others techniques and improve the care they provide. Infinity Dental Partners is a leader in a new era of dentistry commonly referred to as complete health dentistry. This new era of dentistry identifies the importance of the mouth-body connection, and provides a pathway for improved health through your local dentist.
