

Biomedical Research From Ideation to Publication

This book is part of the LWW India publishing program. This program is developed for the Indian market working with Indian authors who are the foremost experts in their respective fields. Our Indian authors do research and teach at the most respected Indian medical schools and academic hospitals. Specially designed for aspiring researchers, this book presents a systematic exposition of the basic principles and methodologies involved in biomedical research. The book covers the entire research process from the conception of an idea, its development, investigation and execution, and finally to its publication. Various research methodologies including study design and statistical approaches to data analysis are also discussed in detail. The importance of ethics and integrity in research is highlighted extensively. In addition, the book discusses relevant issues relating to the commercialization of research innovations and outlines the steps necessary for successful entrepreneurship.
