

The Mosses of Norfolk Island (Flora of Australia Supplementary Series)

An account of the 69 species of moss known from subtropical Norfolk Island, an Australian territory in the south-western Pacific Ocean. Illustrated in colour and with numerous habit and anatomical drawings and distribution maps, it includes an introduction to the island and the history of bryological activity, identification keys to genera and species, detailed and synoptic species descriptions, specimen citations and information on habitat preferences and local and global distribution.
