

## Cancer and the Search for Selective Biochemical Inhibitors

Cancer and the Search for Selective Biochemical Inhibitors examines the nonorthodox methods-particularly plant and herbal possibilities-for treating cancer. This book explores the theory of why and how alternative treatments of cancer should work, with an emphasis on the role of enzyme inhibitors, the basis for most modern drug therapy, including those which may be selective for cancer cell metabolism.

**Cancer and the Search for Selective Biochemical Inhibitors, Second** Cancer and the Search for Selective Biochemical Inhibitors, Second Edition delineates the underlying biochemical principles for alternative cancer therapies.
