

Commando: The Illustrated History of Britains Green Berets

This is the story of the development of the Commandos from the courage and tragedy of Dieppe in 1942 to the biggest amphibious landings in history at Normandy on 6 June 1944, as well as the post-war conflicts in Palestine, Suez, Malaya, Cyprus, Borneo, the Falklands, Northern Iraq and Ulster. A final chapter brings the account fully up-to-date, as it discusses the role of the Commandos in Afghanistan following the terrible events of September 11th. David Reynolds documents the development in the 21st century of Britains Royal Marine Commandos as a key element of the UKs rapid deployment force. Equipped with new assault ships and a purpose-built helicopter carrier, the green berets are on permanent readiness for operations anywhere in the world. They are, in essence, Britains masters of flexible response.
