

# Toxicology Desk Reference CD-ROM: The Toxic Exposure And Medical Monitoring Index

A source of medical, legal and regulatory information on the toxicology of human exposure to metals and chemicals, easy to access CD is designed to be the first resource professionals turn to when formulating an opinion and developing a programme. It is annually updated to provide the latest information on over 150 chemical agents in a standard format, called the TDR profile. Each profile contains the common source of exposure, toxicology, clinical manifestations, appropriate biological and medical monitoring tests, and applicable federal and state regulations.
