

Nonlinear Fields: Classical Random Semiclassical : Karpacz 91, Xxvii Winter School of Theoretical Physics, Karpacz, Poland 18 February-1 March 1991 (Winter School of Theoretical Physics Proceedings)

Main themes are complete integrability, bi-Hamiltonian structures, hierarchies, impact on string theory, links with quantum groups, random perturbations of deterministic dynamics and the onset of stochasticity/chaos in case of particle motion and the relation between randomness and quantization.
