

Clinical Pharmacology and Therapeutics for the Veterinary Technician - Elsevier eBook on VitalSource (Retail Access Card), 3e

Covers fundamental principles of pharmacology in a manner appropriate for both veterinary technicians and students. Provides strong introductory content on safety, terminology, pharmaceutical procedures, drug handling, dosage calculations, and pharmacokinetics. Systematically organized, using chapter outlines for ease of pinpointing desired material, key terms, and learning objectives to better focus readers learning. Summarizes ideas presented using review questions to better facilitate comprehension, and integrated Pharm Facts boxes highlighting important points within the text. Contains the latest OSHA requirements of safe drug and chemical handling in professional environments. New and updated information is presented on all drug categories including new types, applications of existing drugs, and descriptions of previous methods employed. The original, modern design features using a full-color format, new artwork, and a visually engaging design. Clinical Applications vignettes included in the text emphasize concepts related to how problems have arisen with individual drugs or therapies, and what can be learned to avoid similar situations. Self-test questions have been added to the end of each chapter, to help readers prepare for national and state credentialing examinations, as well as classroom work.
