

Using Television and Video in Business (Mercury Business Guides)

The television and video industries have undergone sweeping changes in the last few years. There has been a proliferation of private video and television companies, and advances in the technology, such as the two-way television screen. There have also been changes in international law, governing broadcasts. This book describes the technological revolution that has been taking place in the television and video industry. It also explains how business people can use television and video techniques to improve methods of disseminating information.
