

# Current Developments in Atomic, Molecular, and Chemical Physics with Applications

Proceedings of an International Conference on Current Developments in Atomic, Molecular, and Chemical Physics with Applications, held March 20-22, 2002, in Delhi, India. The 38 chapters cover a broad range of research activities categorized into four sub-topics, namely: \* Processes in Laser Fields, \* Chemical Physics, \* Collision Processes, \* Atomic Structure and Applications.
