

## Oman: the Modernization of the Sultanate (Routledge Library Editions: The Gulf)

Until the 1970s Oman was an isolated, almost medieval kingdom, virtually unknown to the outside world. The 1970 palace coup that brought Sultan Qaboos b. Said Al-Said to power also brought Oman into the twentieth century. Development programmes made modernization a rapid process, and Omans location at the entrance to the Straits of Hormuz gave the country an increasing importance to US security interests in the Gulf region. Yet despite modernization, Oman remains an unknown land. This book, first published in 1987, dispels some of the mystery by focusing on the land, the people and the history. It explores the influences on events of trade, foreign involvement in Omani affairs, and Ibadism (the principal sect of Islam in Oman). It also emphasizes the role of the Sultan in contemporary Oman. The architect of Omans new age, Qaboos has overseen significant changes in the countrys political system and rapid economic growth financed by oil exports.
