

## Jobs as Green Builders and Planners (Green Careers)

Constructing a green building is a huge undertaking that requires the efforts of many people. It takes planners; architects and engineers. It takes builders; carpenters, tile workers, electricians, and plumbers. It takes managers and consultants. All of these individuals have to be knowledgeable about current and emerging technologies, to ensure that everything is as green as it can be. Each of these green jobs and more are profiled in this cutting edge career book designed to introduce readers to one of the leading and most Earth-friendly growth industries of the 21st century.
