

Handbook of Behavioral and Cognitive Therapies with Older Adults

The purpose of this book is to disseminate best practice models of treatment for the common mental health problems of late life, so that evidence-based practice will become the norm (rather than the exception) when working clinically with older adults. Each chapter contains reviews of the empirical literature focusing on studies conducted with elders; then they emphasize how CBT can be applied most effectively to that specific patient population. Case studies illuminate practice recommendations, and issues of diversity are likewise highlighted whenever possible.

Handbook of Behavioral and Cognitive Therapies with Older Adults It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations
