

How Many Teeth Do You Have? Joshua Learns Dentistry

Delightful book that will teach both children and adults about primary (baby) teeth as seen through the eyes of Joshua (a miniature Schnauzer). Joshua's owner (dad) is a dentist/anesthesiologist who treats children while they sleep. He treats children who are harder to treat in a regular dental office. The children he treats are either too young, might be physically challenged, need lots of work, or are really afraid to see the dentist. Joshua lets children know how many teeth they have and how to best take care of them. This book is also available in hardcover on Amazon.com. This is the second book Joshua has written. His other book, Joshua, is also available at amazon.com in hardcover.
