

Interactive Atlas of Oral & Maxillofacial Pathology

The Interactive Atlas of Oral & Maxillofacial Pathology is a multiple award winning multimedia software developed with Tufts University School of Dental Medicine. The software serves as a tool for patient education and as a quick reference in the dental office. It contains detailed clinically oriented information (like etiology, treatment, prognosis, clinical characteristics etc.) of more than 300 Oral and Maxillofacial Diseases with over 1800 high quality colored images. Some of the features include: generation of differential diagnosis, comparison of two different disease entities, magnification, printing and customization capabilities and much more.
