

ION RATIO INSIDE BODY (Qi) HYPOTHESIS THEORY AND ACTUALITY [HT4]

The Dowsing (fortune-telling pendulum, L rods) and the O ring had been assumed to be the living body un-science phenomena that are impossible to verify so far because of the operations under the complex conditions. The O ring test is executed partially of the medical world as the method of diagnosing a living body that obtains the intellectual property right of the United States. However, the hidden mechanism based on the diagnosis has not been still clarified enough. The living body un-science phenomena (rotation operation of the fortune-telling pendulum, the swinging operation of the L rods and the opening and closing operation of O ring) related to the dowsing, O ring can be verified to detect in the Consciousness cognitive science according to the External Qi force - gravity conversion theory unifying the External Qi force and Newtons mechanics. When the Ion ratio inside body (Qi) detector (Patent pending, Qitector) is used, it can be detected clearly than the O ring. As a result, it can be clarified the ideal way of the Ion ratio inside body (Qi) detector to detect each state of the living body, the environment and consciousness looking straight more.
