

## Investing: Blunt and to the Point

Warren Buffet, one of the greatest investors of our time, started from humble beginnings. He started just like us. He was just a regular boy throwing newspapers at peoples doors in the morning. Then he saved up a bit of money and tried to invest. He definitely failed a few times and made some bad investments. However, we all make mistakes. What if he had chosen not to risk his small newspaper salary at the time? What if he had chosen to play it safe? If he chose not to take the risk, would we know the name Warren Buffet today? My book *Investing: Blunt and to the Point*, is not going to teach you how to become an expert investor overnight. Investing on an expert level takes time and experience. The goal of this book is to provide a point and a place to obtain more information. This book will give you the tools and concepts you will need to learn about investing. It provides the resources you need to help you consider why you should invest. An eighty-page book wont tell you all the aspects of investing and how to do it. Honestly, neither would a 2,000-page book on investing. You learn through experience. In short, anyone can invest. All they need is a guide to show them how.
