Excerpt from Railway Eccentrics: Inconsistencies of Men of Genius Exemplified in the Practice and Precept of Isambard Kingdom Brunel, Esq., And in the Theoretical Opinions of Charles Alexander Saunders, Esq., Secretary to the Great Western Railway It appears, then, that the party who introduced the 7-foot Gauge after the 4 ft. 8 1/2 in. Gauge had been in operation for some time over a large district of country, were, like many others, mis taken in their anticipations of the mode in which railways would be laid out and worked in connexion with each other as the system extended itself. It is necessary to Show this, not only in order to satisfy ourselves that the arguments used to justify the introduction of a distinct and peculiar Gauge are not applicable to the present state of circumstances, but also in order to prove that the evils of a diversity of Gauge have long been foreseen by those experienced in railways.
