

The SUM Program Medical Transcription Unit: Orthopedics (Authentic Physician Dictation Training) [4 Audio Cassettes]

(4 Audio Cassettes) The SUM Program Transcription Unit, was developed to meet the growing demand for quality training in medical transcription. Providing hours of authentic physician dictation, the units are designed to simulate on-the-job training within an educational framework by presenting a variety of orthopedics reports with variable dictating styles and regional and foreign accents. The reports have been carefully selected in terms of vocabulary density and subject matter, professionally edited to delete confidential information, and sequenced in a graduated easy-to-complex fashion for maximum learning and confidence building. They represent numerous standard and specialized medical and surgical conditions from the various fields. The SUM Program for Medical Transcription Training uses authentic dictation, not simulated or fake script-read reports. Authentic dictation features natural background noises such as telephones ringing, papers rattling, nurses talking - even a dictator yawning or eating. It is spontaneous, peppered with ums and uhs, false starts, corrections, interruptions, and the run-on sentences characteristic of natural human speech. Script-read dictation, even if the readers are physicians, does not prepare students for the authentic dictation they will encounter on the job and undermines the training effort.
