

Self-Assessment Picture Tests in Dentistry: Pediatric Dentistry

Self-Assessment Picture Tests in Dentistry are designed to help both students and recently qualified practitioners test and improve their clinical skills. This volume contains questions on all aspects of paediatric dentistry. These are of varying types; multiple choice, short-answer and case history, based on the interpretation of clinical photographs or radiographs, choice of materials and the applications of practical techniques. For each one the reader is asked for a diagnosis and recommendation for treatment, with secondary questions on prognosis, complications and so on.
