

Lippincott Williams & Wilkins Clinical Medical Assisting

We're pleased to introduce the fourth edition of Lippincott Williams & Wilkins Clinical Medical Assisting, the medical assisting text designed to be the go-to resource for medical assisting programs that address clinical skills separately from administrative. This dynamic package represents more than just a textbook, instead providing a suite of learning resources. This is the one text aimed at making sure that every graduate can quickly change their cap and gown for a set of scrubs and immediately be a vital member of the medical office. We do this by: Providing the content in an engaging style that speaks to students. Putting pedagogy to work in the text through key features like patient education boxes, competency checklists, procedure boxes, and more. Constantly reinforcing the learning through additional online ancillaries such as videos, animations, and ESL resources. Helping instructors lessen planning time, with robust ancillary resources. New content in the fourth edition focuses on addressing crucial changes in policy and technology. Without changing the engaging writing style we were known for, we've made sure that the content is up-to-date and in-line with the needs of the market. We've added content on emergency preparedness, a crucial topic in today's medical office. In addition, instructors will be happy to find the latest CAAHEP and ABHES competencies clearly addressed throughout the text. Online Tutoring powered by SmarthinkingFree online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.
