

Color Atlas of Comparative Veterinary Hematology: Normal and Abnormal Blood Cells in Mammals, Birds and Reptiles/Section on Blood Parasites

Christine Hawkey, first author, was a veterinary hematologist at an English veterinary college. Those working with birds and exotic animals were thrilled at the work and the detail when this atlas was published. The atlas is still unrivaled in the quality of the color plates and the underlying information. Contrary to the Amazon.com description, this edition is in English not German.
