

## Apples

Apples! Apples! Apples! Crunchy and tasty, sweet and tart, in colorful shades of red, yellow, and green -- sometimes all three -- everyone loves apples! In this lively and vibrant book, young readers will learn how apples grow, from the planting of a tree, to the pollination of buds by bees, and on to the harvest. And then comes the fun part as apples are used to tease the taste buds in so many ways -- in pies and strudel, in cider and applesauce, but most of all, in that one simple crunch when one bites into an apples crisp sweetness. Ken Robbins hand-colored photographs will make you want to take a bite yourself!
