

My First Atlas: Discovering the World

This is an entertaining atlas to help children discover the world's continents. Readers will learn about the various kinds of animals, flowers, and plants that exist in other areas of the world, the stories of other countries, and the lifestyle of the peoples living there. The exciting feature of My First Atlas, Discovering the World is the amazing hardback cover which unfolds to reveal a full color map of the world with dozens of miniature country flags organized by continent or large geographic area, such as the Americas, Europe, Africa, Asia, and Oceania (including Australia and Pacific islands). Here is a fantastic visual representation of the known countries and continents of the world, minus the Poles, studded with colorful visual keys and identifying characteristics. My First Atlas includes chapters on Africa, North America, South America, Asia, Europe, Oceania, and the Poles, plus creative puzzles and learning activities to reinforce all the identifying information on each continental area. In addition, there is an associated legend or characteristic myth or folk tale colorfully retold, associated with each major area. For example, the Oceania legend tells of the Rainbow Snake, an Australian aboriginal legend. Each chapter has brief illustrated paragraphs describing the area's climate, plants, animals, history and population, customs, and a Quick Quiz to reinforce learning. Suitable educational reading for children age 7 and up, My First Atlas is a boon to geography teachers and elementary students who have always wondered about the world.--Midwest Book Review
