

Normal vs Abnormal Aspects of Aging

This book is a nurses view from the inside of the Long Term Care Facility and acute care hospital. During this time, I have seen to many people that have sentenced themselves to a terrible existence with no quality of life. The sad truth is that the majority has brought this fate upon themselves. Instead of living in the Long Term Care facility in your 60s or younger it is possible to live a fulfilling and happy life into your 70s and beyond. The research in this book will outline some of the main contributors to a low quality of life as you age and some ideas on how to avoid this.
