

Oxford Handbook of Nursing Older People (Oxford Handbooks in Nursing)

In the UK, over two-thirds of acute hospital beds are inhabited by people of an older age. The Oxford Handbook of Nursing Older People addresses the knowledge and skills needed by nurses working with older people. This book is an invaluable reference guide that supports nurses in everyday clinical decision-making, covering important issues such as ageism, the role of carers, and mental health, and including guidelines on stroke care, falls management, infection control, palliative care, and medication management. Nurses need to have knowledge of nursing the older person to enable them to provide holistic, person-centred care. The Oxford Handbook of Nursing Older People covers the basic principles and the key factors that are required to provide a high quality service.
