

Primates: The Amazing World of Lemurs, Monkeys, and Apes

Internationally renowned nature photographer Art Wolfe has created a rare and moving portrait of Earth's vanishing primates. An incredible visual journey, *Primates* offers an exciting glimpse of gorillas, monkeys, apes, and other primates at home in the jungle. Wolfe traveled around the globe capturing as many species of primates on film as possible, journeying to the remote jungles of Central and South America, Uganda, and Rwanda, and to research centers and wildlife refuges worldwide. The resulting photographs celebrate the exotic beauty of these intelligent and, all too often, endangered species. From the playful antics of adolescents to the tender gestures between mother and child, *Primates* reveals an animal culture that has been, until now, almost completely inaccessible. Biologist Barbara Sleepers accompanying text presents fascinating insights drawn from her many years spent observing primates. A marvelous blend of word and image, *Primates* offers a studied look at these remarkable creatures and their vanishing habitat.
