

S is for Scientists: A Discovery Alphabet (Science Alphabet)

What clutter-busting need was behind the invention of the World Wide Web? Which stain-fighting chemical got its start when a lab assistant dropped a beaker on a lab floor? In *S is for Scientists: A Discovery Alphabet*, the origins behind some of the most important scientific discoveries are explored. Budding young scientists will learn what Galileo witnessed in a church that led to his theory of measurement; how biologist Rachel Carsons book, *Silent Spring*, helped to spur the first call to action in the environmental movement; and why Ivan Pavlovs study of a drooling dog laid the foundations for a new branch of psychology. From discoveries that fundamentally changed scientific methods to everyday inventions that are now taken for granted, *S is for Scientists* sheds light on the events and people who have shaped our lives today. A former teacher, Larry Verstraete now spends his time writing, visiting schools and libraries, and presenting at conferences and festivals. *S is for Scientists: A Discovery Alphabet* is his second picture book with Sleeping Bear Press. He lives in Winnipeg. David Geisters fascination with American history is celebrated in his work, and his paintings have been featured in *The Saturday Evening Post*. Daves books for Sleeping Bear Press include *B is for Battle Cry: A Civil War Alphabet* and *Riding to Washington*. He lives in Minneapolis, Minnesota.
