

Sandy Hook Traveler Information System

This report focuses on equipment and procedural solutions for gathering and disseminating a wide range of visitor information, including real-time traveler information data relating to traffic and parking at Sandy Hook. Based on an evaluation of the existing TIS efforts, park geography, regional partner agencies, and other data and information opportunities available, this report describes the TIS concept recommended for Sandy Hook. A conceptual framework for a text-based communication platform is presented as a short-term, tangible solution for TIS communication.
