

Avian Medicine: Self-Assessment Color Review (Veterinary Self-Assessment Color Review Series)

This book offers practitioners and students an overview of avian medicine and surgery in an easily assimilable form: over 200 cases are presented as integrated questions and color illustrations followed immediately by detailed explanations designed to educate, not just to test. Covering psittacines, pigeons, game birds, ratites, raptors and waterfowl, the cases appear in random order, just as they would in practice, and cover all the more common avian problems facing veterinarians. The book will be useful as a revision aid in preparation for exams and as a reference in continuing professional development. It will also be a source of much enjoyment to its readers.
