

Space Race: The Battle to Rule the Heavens (text only edition)

From the author of *Seven Wonders of the Industrial World*, the ebook edition of the TV tie-in charting the shocking but true story behind the space race and the ruthless, brilliant scientists who fuelled it. With the end of the Cold War it is now possible to reveal its generation of secrets and cover-ups, bringing an historical opportunity: the unmasking of the true heroes and villains behind the race to be the first to conquer space. This is one of the greatest stories in history, beginning in the throes of the Second World War and spanning through to the moon landings. With the US and Russia pitched against one another during the Cold War, it was the race to create the most powerful rocket and dominate the world, culminating in 1969's giant leap for mankind. The most pioneering and high-risk experiments ever undertaken cost untold millions and hundreds of lives, as mistakes were made, some too horrific to be made public. It is a tale that plays out against a backdrop of communism and espionage. Buried within this multi-million-dollar battle between nations, are the dramatic accounts of the individuals who seek to be the winners at any cost. With ex-Nazi Wernher von Braun on the American side pitted against the enigmatic Sergei Korolev on the Soviet side, this revealing new history shows the extent to which politics and personal ambition combined to create an explosive race for the glory of victory. Note that it has not been possible to include the same picture content that appeared in the original print version.
