

Temporomandibular Joint Disorders TMD TMJ And Botox Treatment Guide: Detailed Guide To TMD and Botox Treatment

As TMJ patients search for alternative treatments to manage their pain, a doctor may have suggested the possibility of trying Botox injections directly into the chewing (masseter and temporalis) muscles to relax these muscles. In addition to its well-publicized cosmetic uses, Botox has been approved by the FDA for painful conditions potentially related to TMJ, such as cervical dystonia and migraine.
