

## The Caregivers Tale: Loss and Renewal in Memoirs of Family Life

Ann Burack-Weiss explores a rich variety of published memoirs by authors who cared for ill or disabled family members. Contrary to the common belief that caregiving is nothing more than a stressful situation to be endured, memoirs describe a life transforming experience-self-discovery, a reordering of ones priorities, and a changed view of the world. The Caregivers Tale offers insight and comfort to individuals caring for a loved one and is a valuable resource for all health care professionals. Identifying common themes, Burack-Weiss describes how the illness career and social meaning of cancer, dementia, HIV/AIDS, mental illness, and chemical dependence affect the caregiving experience. She applies the same method to an examination of family roles: parents caring for ailing children, couples and siblings caring for one another, and adult children caring for aging parents. Jamaica Kincaid, Sue Miller, Paul Monette, Kenzaburo Oe, and Philip Roth are among the many authors who share their caregiving stories. Burack-Weiss provides an annotated bibliography of the more than one hundred memoirs and an accompanying chart to help readers locate those of greatest interest to them.
