

Developments in Tourism Research (Routledge Advances in Tourism)

This book aims to be a showcase for cutting edge research offering a high-edited selection of the best paper submitted to the 2006 tourism conference at the University of Surrey, which itself is a celebration of 40 years of tourism education at the University. The emphasis of the book is on contributions which offer new insights and approaches to tourism research rather than case studies or applications of existing research methods to new contexts, and this is where the book is unique.
