

Red Rock Canyon National Conservation Area Transportation Feasibility Study

The Transportation Feasibility Study addresses growing concerns with traffic and parking congestion at popular recreation sites within Red Rock Canyon National Conservation Area (RRCNCA), a Bureau of Land Management (BLM) natural area in Clark County, Nevada. The Transportation Feasibility Study builds on several past efforts to examine the causes of congestion at RRCNCA and to assess the feasibility of potential transportation strategies. This study will focus on alternatives and strategies that are feasible, cost-effective, and implementable, targeted to address current transportation conditions and visitation patterns at the site.
