

Tyrannosaurus Rex: A History Just for Kids

Out of all the meat-eating animals that have ever lived on the planet Earth, the Tyrannosaurus rex is one of the most awesome. Though the last of these huge carnivores lived 65 million years ago, they are still famous and capture our imaginations maybe more than any other dinosaur except the three-horned triceratops that they lived alongside. In this book, you'll learn all about what made this massive giant great--from what they looked like and ate to where they lived and what they did all day.
