

UK Ambulance Services Emergency Response Drivers Handbook

The handbook has been written by the staff who developed the most recent national driver training standards and who have years of experience in ambulance driver training. It provides a summary of the standards and practices expected of a driver of an ambulance service vehicle, for both emergency and non-emergency use. During ambulance driver training this handbook is combined with practical instruction delivered by expert trainers. The handbook is designed so that it can be used for self-study, either before or during a course, and for ready reference afterwards in order to maintain skill levels.
