

Gurps Bio-Tech

The Future is Alive Who needs chrome, pal? Meat is where its at now. Mother Nature always did it best - she just needed a little help. Get down to the black clinic, old-timer, and you can be 15 again. That is, if you still want to be human at all. Its the technology of the posthuman age: biotech! Upgrade your old body with steroids and smart drugs, transplants, and viral nano ... or just get a new one. Maybe you dont think being human is so great? Then improve on nature with eugenics and gene-fixing. Or just go parahuman: if you love cats, become one! The technologys changing fast, but youll have lots of time to get used to it - death is a temporary inconvenience with cryonics and immortality drugs. And who needs silicon and steel? Vatbrain biocomputers are where its really at! But its not just about the future. GURPS Bio-Tech includes a full range of 19th, 20th, and 21st-century medical equipment, from early vaccines to surgical robots, along with game stats for the worlds most deadly diseases. GURPS Bio-Tech also includes a complete set of character templates for biotech professions, rules for biotech magic, and two original campaign settings: an alternate Earth ruled by a clone of Alexander the Great, and a living starship on its way to colonize an alien world! Say goodbye to your old body. Have you upgraded your genetics this year? This is the second edition of GURPS Bio-Tech. It has been revised to the GURPS Fourth Edition rules and expanded to cover medicine, drugs, magic, and new technologies. Some entries were introduced in GURPS Space, GURPS Robots, and the Transhuman Space series.
